JUNIOR HIGH NEWS

WHAT'S NEXT FOR 8TH GRADERS —HIGH SCHOOL

One of the best ways to hear about our high school program is through the eyes of our former 8th grade students. The high school freshman returned to encourage junior high students who will begin their high school journey next year. The students shared their experience transitioning to MCS' High School, and talked about what 8th graders can look forward to when they enter high school. New adventures await them!

FROM THE FRYING PAN TO THE SCIENCE ROOM!

Who knew eggs were just not used for cooking! Junior high students began a multi-day experiment to observe the movement of water across a selectively permeable membrane (in this case an egg membrane). This process is all related to the cellular transport called...osmosis.

THE WONDER OF CHEMISTRY

Science is a broad and fascinating subject, and Mrs. Vogel sure knows how to spark our students' interest! In one of her classes our 8th graders used Bunsen burners to heat various chemical solutions, and then proceeded to record the colors of the flames. This was during the chemistry lesson on the bonds that elements can form. Specifically, they burned copper chloride, strontium chloride, potassium chloride, and calcium chloride.

A LOVE FOR READING!

Picture a cozy corner with comfy chairs, friends and a good book. That is exactly where we found 3-year-olds in Mrs. Backues' class. Our precious preschoolers share a love of exploring books and reading together. Now that's a nice way to build friendships!
