

## INTERPRETING MAP SCORES THROUGH NWEA GENERATED REPORTS:

Maranatha Christian Schools partners with NWEA to transform raw data into actionable insights to help teachers develop instructional strategies to meet each student's needs. The new features and enhancements of the reports generated throughout the year allow teachers to have a clear view of student performance and growth. Your child will be given a Student Profile Report along with a Student Progress Report to understand their strengths and where they need to place emphasis when setting goals. The report descriptions and sample reports are accessible below:

### STUDENT PROFILE REPORT

This detailed report is a valuable tool to review a student's overall progress from all past terms. It is also informative to the student and teacher as it allows for goal setting from term to term. Shortly after each testing session when the window for testing closes, students will be given this report to assist with their goal setting activities. Areas of relative strength and suggested areas of focus will be discussed and documented so students have an investment in their learning pathway.

### STUDENT PROGRESS REPORT

This report is an interactive collection of data that gives a complete picture of a student's growth and performance. Teachers will use this report to help students set specific goals in each subject area. Teachers also gain insight through this report as to what a student is ready to learn which allows them to tailor their instruction towards specific learning outcomes.
